CONSOLIDATED REPORT ON PAYMENTS TO GOVERNMENTS — REPORTING PRINCIPLES

3. Personal scope

In accordance with Chapter 6a of the Accounting Act, the report on payments to governments shall be prepared by undertakings active in the extractive industry or undertakings active in the logging of primary forests.

An undertaking active in the extractive industry means an undertaking with any activity involving the exploration, prospecting, discovery, development, and extraction of minerals, oil, natural gas deposits or other materials, which falls within the scope of the activities listed in Section B.05-08 of the Polish Classification of Activities.

An entity logging primary forests is understood as an entity engaging in the activities referred to in section A.02.2 of the Polish Classification of Activities in an area covered by primary forests.

In compliance with the requirement of Article 63g of the Accounting Act, the Company has prepared the consolidated report on payments to governments for the Group’s subsidiaries active in the extractive industry. The Group’s subsidiaries do not engage in any activity related to the logging of primary forests.

This consolidated report on payments to governments presents payments arising from the extractive operations of two subsidiaries, namely TAURON Wydobycie S.A. and Kopalnia Wapienia Czatkowice Sp. z o.o.

In the year ended 31 December 2020 and in the comparative period, the subsidiaries TAURON Wydobycie S.A. and Kopalnia Wapienia Czatkowice Sp. z o.o. satisfied the criteria laid down in Article 63f of the Accounting Act, which means that at least two of the three thresholds specified therein were exceeded and the payments made in the year ended 31 December 2020 and in the comparative period were at least the equivalent of PLN 424 700.

4. Material scope

4.1. Governments

This consolidated report on payments presents information concerning payments made in the year ended 31 December 2020 and comparative information for the year ended 31 December 2019 to governments, i.e. central and/or local governments as well as entities overseen or controlled by such governments.

The payments reported herein were made to governments in Poland. In the year ended 31 December 2020 and in the comparative period, no payments were made to foreign governments.

4.2. Cash basis

This consolidated report on payments to governments presents payments made in the year ended 31 December 2020 and comparative information for the year ended 31 December 2019.

The payments reported herein concern amounts paid in cash. In the years ended 31 December 2020 and 31 December 2019, no amounts were paid in kind and settled by delivery of a commodity or services relating to extractive operations.

4.3. Presentation currency and materiality threshold

The Polish zloty ("PLN") is the presentation currency of this consolidated report on payments and, unless otherwise stated, all figures are in PLN thousand.

Under Article 63f of the Accounting Act, the obligation to prepare a consolidated report on payments arises where a single payment or an aggregate amount of related payments made by an entity in the financial year is the equivalent of at least PLN 424 700.

This consolidated report on payments does not present single payments or aggregate amounts of related payments which are lower than PLN 424 700.

A related payment is a periodic payment or an instalment payment under an agreement.

4.4. Project

In its consolidated report on payments the Company has presented data broken down by two categories, i.e. payments to the appropriate government levels by basis, as referred to in Article 63e.6 of the Accounting Act, and by project and basis of payments.

A project means operational activities, in particular extractive operations, carried out by the Company's subsidiaries under an agreement or a decision, in particular lease, rental, licence or concession. An agreement or a decision forms a basis for determination of payments made to governments. Where multiple agreements or decisions are substantially interconnected, the operations carried out thereunder are considered a single project. In the event that there is a single framework agreement or a decision interconnected with detailed agreements or decisions, the operations carried out thereunder are considered a single project.

The payments made to governments in the year ended 31 December 2020 and in the comparative period have been assigned to two projects:

- Extraction of coal from deposits at TAURON Wydobywanie S.A.; and
- Extraction of carboniferous limestone from the "Czatkowice" deposit.

The above projects are carried out as part of the mining business of two subsidiaries subject to the reporting obligation, i.e. TAURON Wydobywanie S.A. and Kopalnia Wapienia Czatkowice Sp. z o.o.

If a payment may not be assigned to a specific project, it is disclosed by the Company at the entity level as opposed to the project level. This is the case when payments are made on account of obligations imposed on the Group companies at the entity level as opposed to the project level. The amount of corporate income tax paid is an example of such an entity-level payment.

4.5. Bases for payment

Under Article 63e.6 of the Accounting Act, the reporting obligation applies to the following bases for payments:

- Production entitlements

Production entitlements are amounts due in relation to production, paid to governments in kind in the form of raw materials extracted, under an agreement or a decision.
